

Crypto Cocks

Crypto Cocks is a project created on the basis of Crypto Punks and consisting of 333 randomly generated images.

We are in the 2000s, the internet is more and more popular and simple images of cocks are about to go viral ... why buy them? Simple! So you can tell your friends that you bought a cock picture.

Owning one of these 333 NFTs will allow the owner access to a future (more serious) project that we are disclosing to, and which will be released in the coming weeks.
